BANKERS' DISCRIMINATION AGAINST INDUSTRIAL COLLATERAL.

Statement of the Steel Corporation-Money Outlook.

NEW YORK, Oct. 5.-The holiday in London to-day accentuated the duliness | in this market of late. The fact that there is no loan market at the Stock Exchange on Saturday also tended to relax the pressure upon the market. Perception is growing of the fact that the question of ket liquidation may have to extend. While there has been no stringency of money during the week this is due to the fact that ers have been discriminating against industrial collateral rather than making up the ruling rates for call loans. Owing to the continued firmness of sterling exchange, in spite of a larger supply of coton bills this week, relief by gold imports does not appear imminent. Demand continues from bankers short of exchange, and experts in that market declare that a large short interest remains to be covered during November. It is said that some fresh sterling loans have been negotiated this week. The loan increase in the bank statement revealed that other forces are still at work in the credit market which offset the stock market liquidation. This and the renewed pressure against Amalga-

mated Copper depressed the whole market. There has been some irregularity in the stock market from time to time during the week and dealings have been on a small scale. The course of prices in the main has Belt Rallway pref..... been downward and the weakness increased during the latter part of the week. The support of the market at the weak spots Kinley, and which was attributed to the joint efforts of the great banking and financial powers of the country, has been conspicuously lacking. A feature of many of Diamond Match the railroad reports coming to hand, both for transcontinental and the trunk lines, is chieved on a somewhat lessened volume of actual tonnage moved. This is a practithe maintenance of freight rates and reflects the progress made in the community of interest as a factor in suppressing the rate-cutting, which has made such inroads tpon railroad earnings in times past. On the other hand, the reduction in the freight | per cent. Prime mercantile paper, 405 per movement is not an entirely reassuring cent. Sterling exchange nominal, with fact. In part, this condition is due to the actual business in bankers' bills at \$4.85400 higher grade of much of the freight which | 4.85% for demand, and at \$4.83% for sixty You can if you will. is moved and which is a natural conse- days; posted rates, \$4.84 and \$4.861/2; comquence of the prosperous conditions of the country. The eastward movement of agri- 855,166; balances, \$10,050,949. cultural products shows a falling off, partly owing to the shortage of the corn crop and you; it will draw oth- the holding back of cotton. But the west-ward movement of merchandise whose the holding back of cotton. But the westclassification is under higher freight has continued at an unprecedented volume, While this condition has served to sustain railroad earnings, it is obviously not a selfthe enjoyment of past prosperity. In the steel trade the reports are of excellent con-ditions, following the settlement of the labor dispute, with large new demand in filling belated orders, and with a large resdue of steel rail requirements thrown upon next year's production by the mills. published by the United States Steel Corof the regular quarterly dividends pon its stocks is considered corroborative of the healthy condition of the steel in-

oustry, which is regarded as an index of the business condition of the whole coun-The withdrawal of artificial support from the stock market, however, revealed some disturbing conditions as to the status of nany stocks which had been most subjected to manipulation. Some of the minor rail-road stocks which had been subjected to operations by speculative pools suffered wide relapses, but the most striking effects were shown in the long list of industrials. esulted in a collapse of their prices into ragments. Several factors combined to twaken the latent distrust with which these securities are habitually regarded, and which is reflected in the low prices at which they sell, compared with the rate of dividend return. The nominal cause was merchandise at the port of New York for the declared constitutinality of an anti-trust law of New York State, which emphasized a growing dread of attack by federal legislation. The collapse of the stock in all copper earlier in the month has caused increasing attention to the lack of public information regarding conditions other industrial corporations. The action of the United States Steel Corporation in ublishing a statement of monthly earnings sened up the necessity of other corporafollowing suit. Yearly reports of some of the minor companies recently have the division of redemption, shows: shown declines in net earnings and resort | Available cash balance...........\$171.795,003 to the surplus to maintain dividends. The Gold 102,274,240 whole question of overcapitalization and ability to continue dividends in any but the most prosperous times have received renewed attention, and parallels are drawn with the experiences of railroad corporaions under the earlier financial methods of the country, and the bankruptcies and reorganizations in reaching sound condition of organization. Money market condi- Expenditures 1,210,000 tions have continued favorable, but the ternation of the interior demand for cur-

is awaited to insure future condi-Railroad bonds have been dull and irregular. United States threes declined 3%, the ives 1/2 and the new fours 1 per cent. The | Shipments of Money to the Interior refunding twos advanced % over the closing call of last week. Following are the day's share sales and price changes:

Pacific was the weakest of railroads, and the fact that the Gould stocks and the Standard Oil stocks have been the leaders n the decline during the week induces the belief that these interests are in favor of ower prices. The bank statement had very little effect upon the market. The decrease in the surplus reserve was only a little over \$700,000, leaving it at \$15,560,025. The increase in loans was unexpectedly large, but was robably due to certain special transacions, such as the purchase of Broadway National Bank. The shipments of currency to the interior during the past week have been far larger than had been expected, and it is the opinion of those who are in a position to judge that these shipments will continue for some weeks. On the other hand, the banks have received all the assistance from the subtreasury that that institution can afford; consequently, unless gold importations take place, a steady decrease in the resources of banks during the next few weeks may be looked for. Market Generally Weak.

NEW YORK, Oct. 5 .- The old saying 'As goes St. Paul so goes the market' should be changed at present to read "As goes Copper so goes the market." Weakness in Copper unsettled whole lists, and the close was generally weak. The large increase in loans in the bank statement in the face of the decline in stocks caused comment and some selling of securities The statement was made afterwards that this increase in loans was mostly on ac count of the purchase of Broadway banks and could be only temporary. Sentiment yesterday at the close was less bearish, and there was considerable confidence that the market would hold its own early to-day but the crowd was bearish again and lower prices on Monday are expected.

[Granger Farwell & Co.'s Telegram.]

SATURDAY'S DULLNESS WAS A BUL FACTOR ON THE MARKET.

Provisions Did Not Follow the Advance of Wheat, Corn and Oats and Closed Somewhat Lower.

CHICAGO, Oct. 5 .- The usual Saturday conditions, and December wheat closed %@ | 5.10c; cubes, 5.35c. December oats a shade advanced. Pro-

Practically the only bull argument for wheat at the opening was a better tone in the cables. Receipts were still large, the weather perfect and there was no large 1/4c to 1/4c higher, at 68%c to 68%c and on some fair local buying began to throw off the bear influence that has pressed it for the last week. May wheat had a fair trade, the last week. May wheat had a fair trade, the last week. May wheat had a fair trade, sacked, east track, 77@75c. Hay dull and easy; and following this and a report of increased buying for export December advanced and closed firm and %@14c up, at 69@6914c. Re- steady; extra shorts and clear ribs, 819; clear ceipts were ninety-nine cars, none of con-tract grade. Minneapolis and Duluth re-tract grade. Minneapolis and Duluth re-twine, 9c. Receipts—Flour, 7,000 bris; wheat, ported 848 cars, making a total for the three points of 947 cars, against last week's 1,044 and 780 a year ago. Primary receipts were 1,175,000 bushels, compared with last year's 797,000 bushels. Seaboard clearances in wheat and flour equaled 240,000 bushels, Australian shipments this week were 384,000 bushels, against 76,000 bushels last week. Corn had a firmer undertone, helped Straw, \$5@5.50. Clean ginseng, \$4.55@4.75 per lb. largely by better cables and a desire to cover short accounts over Sunday. General conditions were still bearish, especially the fair weather, but in sympathy with wheat December, which opened %c to %c higher, advanced to 56%c and closed steady and 46%c up, at 56%656%c. Receipts were 283

LONDON.-Money, 14/22 per cent. Discount rates-Short bills, 23-16/24 per cent.; Oats had a dull, narrow market, with scalpers handling most of the business. December was off a shade at the opening, PARIS .- Three per cent. rentes, 101f 121/2c but there was enough outside demand to hold prices and bring a steady close for Sc for checks. Spanish fours closed at 70.50. December, which was a shade higher at BERLIN.-Exchange on London, 20m 3812pfgs for checks. Discount rates-Short 5%c. Receipts were 185 cars. Provisions were dull, and in spite of debills, 34 per cent.; three months' bills, 2% cline seemed to have a good undertone. Early liquidation brought lower opening prices for January products, but a fair local and cash demand absorbed them with but small losses. January pork closed 121/2c NEW YORK.-Bar silver, 57%c; Mexican down, at \$15.55; January lard 10c lower, at \$9.174, and January ribs 5c down, at \$8.074. Estimated receipts for Monday-Wheat,

DO WE DRINK TOO MUCH! This Authority Does Not Uphold the

Much Water Drinking Fad. Springfield Republican This question is not intended to apply to the consumption of intoxicating beverages, than one answer; but jeiales to pure water, which has not usually been considered harmful. Yet a writed in the Hospital assures us that most people take too much of it. He says: "We new and again come. across patients who assure us that they never drink, a statement which it is our arst and, perhaps, most natural impulse to regard as an exaggeration. So, indeed, it may be, for on cross-examination such patients would probably say, 'Oh, yes, I take a little soup, of course. Still the general statement remains true that there are people who never drink in the sense that they never use cup or glass, and there certainly are a large number of people who drink only very little, ridiculously little compared with those around. These are healthy people going about their business calmiy, doing good work, and often doing it with far greater comfort than those who, with ginsy in one hand and handberchief in the other, mop their faces and declaim against the sweltering weather. Thus we are led to ask, why do we drink? and to answer that for the majority it is to a large extent a matter of habit and of self-indulgence. As the requiet; No. 2 red, 73 gc. Corn easier; No. 2 mixed, suit of habit with many people, the slight-suc. Oats dull; No. 2 mixed, 384-039c. Rye est sense of thirst sets up tongings which cannot be, or at least are not, resisted, with the result that much more fluid is taken than is wanted. 'Are you very thirsty? inquired the doctor. 'Weil, no, sir, I takes good care o' that,' replied the affable patient as he mopped his brow.

"Much of the constant drinking, not merely of alcoholics, but of fluids of all kinds, to which one is tempted at every turn, is quite unnecessary and only leads to flabbiness and discomfort. In considering the amount of fluid we ought to drink we must always bear in mind the quantity of water which is contained in our ordinary food. According to Parkes we may take it that we require for ordinary work about three times as much water as of food (calculated dry), namely, about % per cent. of the whole intake, and if we look at the table in packages. Market steady: State dairy, 146 ne: which he gives the smount of water contained in the various kinds of food, we find how many articles carry with them more than the required proportion. For instance, beefsteak contains 74.4, white fish 78, poultry 74, potatoes 74, cabbages 91, carrots 85, vegetable marrows 95, and even dry bread contains 40 per cent. of water. As to fruits, apples contain 82 and strawberries 90 per cent. of water. Gravies, sauces, etc., and all forms of milk puddings, also contain more than the full average supply of water pe-quired, so that it evidently would be an easy task to arrange a diet which, although id enough for all demands, would not require to be supplemented by actual drinking. If, however, we will but partake of fluid in moderation, say 40 or 50 ounces a day, we are the better for it, for certain foods require the production of a not inconsiderable amount of digestive juices for their proper assimilation, and if we persist in eating so much meat as so many of us do, a fair amount of water must be taken to

> Pistols Twenty Inches Long. Greenville (S. C.) News:

"When does the new!law, passed by the ast Legislature in regard to pistols, go into effect?" was asked:a News reporter by a hardware dealer. There seems to be considerable doubt as to the time when the law is to go into effect. Upon investigation, it was learned that July 1, 1902, is the time, when no more pis-With- | sold to those who want them. A weapon of in the hip pocket, but the law goes further and prohibits the carrying of any sort of tirearms, concealed or otherwise. It is said that there is no law against the selling of cartridges after July, 1902, which importation of pistols in South Carolina from other States any more than it can prohibit the importation of whisky. So that it will be easy to secure a pistol through ishes a pistol constabulary there will be nothing to prevent pistols from being im-

The Bride Annoyed.

New York Evening Sun. One of the stock jokes of the alleged omic papers is the old one about the imortance of the wedding as a spectacular ffair, from the bride's boint of view. This as been denounced often enough as a crude and brutal piece of masculine humor. But ometimes truth is stranger that the exravagance of the jest; makers. When a nan was arrested for attempted bigamy it the very altar the other day, was the bride grateful for the intervention of the courts? Not at all. She exclaimed angrily to the pollceman when he told her that she could not marry a man who was married already, "That may be, but what about all these flowers and carriages and dresses? I tell you I must be married. il the arrangements anve been made. What is a little thing like the law when NEW YORK, Oct. 5 .- Petroleum quiet; rafined | the wedding march is playing and the wed-

1129 Law Building. MASQUERADING AS MEN.

Easy to Understand Why Women Might Do This. Boston Transcript. For some reason these repeated discoverles that women have succeeded in masquerading as men with the aid of men's ciothing until death revealed the truth doesn't seem to surprise us so much as one would think we ought to be surprised at such upsetting of conventions. In the first place, all of us, no matter how happy we may be at the present time, can recall days or hours when we wanted to be some one else or any one else. With some such emotion almost universal as one of the runimentary experiences, it is not very difficult to imagine one in whom it became rampant suc-

cumbing to it, and going in for being a totally different person, even of the other Then, too, with all respect and courtesy for maids and matrons the world over, it can be freely admitted that while no man was ever heard to wish he were a woman, many a woman has said to herself and to others that she wished that heaven had made her a man! Often her aspiration has been qualified with the desire to be "such a man" as "would show them"-presumably the men-how certain affairs should be conducted. But the chief prompting to the desire to exchange sexes is probably the be-Hef that men in their dally lives have more Heeman day and night on guard. Designed for freedom, more immunity from gossip and greater relief from the details that sometimes make a woman's life monotonous from her inability to be superior to them. Many and strong urgings from this point of view are probably sufficient in cases to lead women to risk masquerading as men. n time a few of these cases come to publicity. Within a year we have had two prominent instances of almost life-long deception of the community by women in men's clothing. It cannot be said that either case led to the other, as they had been so living in widely-separated places for a numper of years before the public was apprised. Who knows whether there are not more of these surprises on the way. One is set to wondering if he knows any women posing
